Special Needs Units

Two bedroom, two bathroom

All special needs units feature card key lock entry, lever door handles and one-inch thresholds. All doorways have at least 34" of clearance. Bathrooms are equipped with 18" toilets and lavatories with 28" of knee clearance. Standard tubs/showers have hand-held shower heads, grab bars and fold-down benches. A portable bath bench that has back support is also available. Bedrooms are spacious, with plenty of access on both sides of the bed. Kitchens boast sinks with 27" of knee clearance, front control appliances and microwaves 36" off the floor. A 5'x17' deck with a 35" doorway overlooks the wooded surroundings.

Though the other two-bedroom units are not specifically designed for access, the ground floor units with one step represent the best alternative. These have 33" entries, but bedroom doors are only 27" to 29" wide and the most accessible bathroom only has a 25" wide entrance.
