Pinetop features a lowered section at the check-in counter for disabled guests, paved walkways to all resort facilities, handicap parking spaces and an accessible indoor recreation area which includes an exercise room.

Special Needs Units

Studio, one bathroom

Two bedroom, two bathroom

Three bedroom, two bathroom

All special needs units feature standard key entries with 33" of clearance, lever door handles and level thresholds. All interior doorways have at least 31" of clearance. Bathrooms are equipped with grab bars and 15" to 18" toilets but lack knee clearance under lavatories. The studio and three-bedroom units have standard tub/showers with fold-down seats, hand-held shower heads and grab bars. Portable bath benches with back support are also available. The two-bedroom units' bathrooms have a 32"x60" roll-in shower with fold-down seat. Kitchens have appliances with front controls and microwaves 36" above the floor.

Though ground floor two- and three-bedroom units are not specifically designed for disabled access, these units represent the most accessible alternatives with level entrances, lever entry handles and interior door widths of at least 33". The layouts are nearly identical to the special needs units, lacking only a few features such as grab bars.
