Registration lobby doors are easy to open and the registration desk is less than 36" high. There is an outdoor pool and spa and a lift available for disabled access.

Special Needs Units

Two-bedroom, two-bathroom

Three-bedroom, two-bathroom

The special needs units all have card key lock entry, lever door handles, level thresholds and 32" entry clearance. Interior doorways have 33" of clearance. The special needs bathrooms are equipped with grab bars, 18" high toilets, 28" of partially blocked knee clearance under the lavatories and 16" tub/showers with hand-held showerheads and portable bath benches. One special needs two-bedroom and one special needs three-bedroom unit each have a 28" x 58" roll-in shower. Bedrooms have 36" clearance on at least one bed side. Kitchens have front control oven/stoves, counter microwaves, 34" counters and 34" sinks with partially blocked 28" roll-under access. Dining room tables have 24½" knee clearance and living areas have an open design. There is 30" access and a 1½" threshold to the 6' x 7' decks.

All standard units have floor plans similar to special needs units and include 32" doorways, lever handles on all doors and bathrooms large enough to accommodate most wheelchairs. However, only four of the buildings have elevators or accessible ground floor units, so mobility impaired guests must make certain they're booked into Buildings 4 or 6—which have elevator access to all units—or ground floor units in Buildings 2 or 3.
