## Special Needs Unit Features

- No special needs units at this property

## Resort Accessible Features

- One TDD unit available
- Accessible entrance into the facility housing the indoor pool, spa and arcade

Surfside Inn has no special needs units, but has accessible entrances to the second floor where the WorldMark check-in counter and some one- and two-bedroom WorldMark units are located. This property also has a TDD unit and an accessible entrance to the indoor swimming pool and spa. (Because there is no wheelchair accessible path to the swimming facilities, which are located down hill from the guest units, WorldMark recommends that mobility impaired guests drive down to the swimming area and park in the handicap parking spaces provided.)

## Special Needs Units

No special needs units at this property

Though neither the one- or two-bedroom units are designated as special needs, the two-bedroom units represent the best alternative. These units feature 35” entrances and interior door widths of 28”. The living areas are open with 36” counters and dining room tables with 27” of knee clearance. The queen bedroom has at least 32” access on both bed sides and good maneuvering space at the foot. However, bathrooms in these units are too small and tightly arranged to accommodate even the smallest wheelchairs.

Photos are from a two-bedroom standard unit

This guide was researched and compiled by WorldMark owners Larry and Rachelle Topliff. Their company, Accessible Solutions, helps businesses provide better access for all.
