- Accessible routes to all resort facilities
- Lowered check-in counter
- Elevators
- Lift for disabled access to pool and spa
- All guest units have Braille designations

WorldMark Seattle is located in the heart of downtown Seattle on level to gently sloping property. Due to the historic nature of the resort the only accessible entrance is located in the alley behind the building. When disabled guests arrive, they will need to alert one of the valets out front of their need so they may receive a key to the power door at the rear of the building. Guests should be aware that inside they will find a 12' section of somewhat steep ramp followed by a long, gently sloping section of ramp that provides access to building elevators. The check-in counter has a 30"-high section, elevator access to all special needs units and accessible routes to all resort facilities, including the outdoor pool and spa, which has a hooyer-lift available for disabled access to both.

Special Needs Units

One bedroom, one bathroom

Two bedroom penthouse, two bathroom

All special needs units feature card key lock entry, lever door handles and level thresholds. All doorways have at least 32" clearance. Bathrooms are equipped with 18" toilets, 28" of knee clearance under lavatory, grab bars and 30"x5' roll-in showers with fold-down or portable shower seats. Bedrooms have at least 38" access on one bed side. Kitchens have 34" counters with a roll-under work area. Dining room tables have 28" knee clearance, and living rooms are easy to maneuver through. The two-bedroom penthouse has an 11'x14' accessible roof patio, patio table with 28" knee clearance and stacking washer/dryers with 48" controls. One-bedroom units share side-by-side, front loading, front control washer/dryers located in laundry rooms near the elevator of each floor.

No standard units are recommended for mobility impaired guests due to narrow interior doorways and bathroom layouts that don't provide adequate space to accommodate wheelchairs. The exceptions are the two-bedroom penthouse queen and two-bedroom penthouse twins, which have spacious enough bathrooms to accommodate most wheelchairs that can navigate the 25½" bathroom doorway.
